

Cleanfix presents the smallest ride-on scrubber dryer

Sit in comfort instead of trailing behind – and at the same time manoeuvrable and narrow like a walk-behind model. A fairy tale? No, this is what the new ride-on scrubber dryer RA 535 IBCT from Cleanfix has to offer, first demonstrated at Interclean in Amsterdam. The tight curve radius, narrow passage width and economic efficiency are revolutionary.

Cleanfix RA 535 IBCT

Small but perfectly formed. The new ride-on scrubber dryer RA 535 IBCT is smaller and more manoeuvrable than expected. This is particularly appreciated not just in supermarkets, but also by every caretaker. For example, it is often very difficult to clean in cramped school exits: all sorts of things are in the way and have to be driven around.

Just right for the new RA 535 IBCT – small, manoeuvrable, fast and in addition convenient. It is used in cleaning hard and elastic flooring in industry, trade and public institutions. The machine is so small that it fits into every lift.

RA 535 IBCT from Cleanfix fits into every lift

Integrated charger

The scrubber-dryer features an integrated charger, located inside the machine, protected against wet. After use, open the battery compartment, unreel the cable and simply plug in – to charge the batteries.

CADS (Cleanfix Advanced Dosing System)

Using the optional CADS (Cleanfix Advanced Dosing System) ensures that the right amount of detergent is added to the fresh water. Before beginning work, simply set the chemical concentration desired on the operating panel, connect the canister and off you go. This allows you to save up to 50% in chemicals, preserving both your budget and the environment. Chemical precipitation in the fresh water tank is a thing of the past. The chemicals can be changed quickly, without having to discard the entire fresh water tank. The operator no longer comes into contact with the cleaning fluid.

Chemical dosage is set on the operating panel

Operation

The filling hose guarantees easy filling of fresh water. The machine is ready for operation at the push of a button. The brush and suction base lower fully automatically. The operator depresses the accelerator – cleaning begins. Thanks to the charging indicator display on the operating panel, drivers can see how much longer they can drive at all times. The comfortable seat guarantees fatigue-free work. The suction base is installed directly behind the scrubbing brush beneath the vehicle and protected and as a result, it cannot get stuck. This makes looking backwards unnecessary – full concentration ahead. As a result, cleaning is up to twice as fast as with a walk-behind model.

Full speed ahead with Cleanfix RA 535 IBCT

Simply fill with fresh water

Special features

The dirty water tank of the RA 535 IBCT is easy to open and clean. The big wheels ensure absolute safety while driving. Emptying of the dirty and fresh water occurs through the two tubes attached to the back of the machine. The machine can be optionally fitted with a HEPA filter. Allergy sufferers in particular appreciate the 99.99 % clean exhaust air.

Comparison

	Standard Ride-on	Stand-up	Walk-behind	Cleanfix RA 535 IBCT
Fatigue-free	XXX	X	X	XXX
Manoeuvrability	X	XXX	XX	XXX
Economic efficiency	XX	XX	X	XXX
Value for money	X	XX	XX	XXX
Clearness	X	XX	X	XXX

XXX = above average

XX = average

X = below average

INOX – version

For demanding applications and requirements the RA 535 IBCT is also available in the INOX version, especially for indoor swimming pools and cheese dairy, where environmental conditions are very special.

Key technical data

Scrubbing width	53 cm
Suction width	60 cm
Turning circle	150 cm
Cleaning speed	3-5 km/h
Top speed	5 km/h
Theoretical surface capacity	2650 m ² /h
Autonomy	2.3 h
Fresh water tank	55 l
Dirty water tank	55 l

Cleanfix

Cleanfix is constantly researching market needs and adapts its development of innovations accordingly. Particular attention is paid to the environment, with Cleanfix machines being made from metal and plastic – materials that are almost fully recyclable. Cleanfix stands for top Swiss quality, innovative ideas and sustainable production.
